

Hosted Virtual Desktop v2

Your Desktop - Anywhere, on Any device

Lightning Fast, Fully Supported and Maintained

Part of the 'cloud computing' concept, a hosted virtual desktop looks and acts exactly like a traditional PC but, instead of residing locally, all software and data are housed in our state-of-the-art data centres. Hosted desktops offer numerous advantages in terms of cost savings, security, resilience, and flexibility.

Hosted desktops are beginning to replace the traditional idea that all office staff must have a full PC sitting beneath their desks. Of course, in today's world businesses need their employees to have access to computers to communicate and to perform all manner of tasks.

However, the way in which this can be facilitated is evolving. Buying, setting up and maintaining PCs is an expensive exercise, especially when you factor in the associated management time and costs. Hosted Desktops removes this headache by providing you with a hosted desktop environment, which you can connect to from anywhere via the internet - in the office, at home, or even abroad.

Windows 7 Experience...

Whether you are migrating from another operating system, or just moving from on-premise to the cloud, you want to take advantage of Microsoft's latest technology with-out the costs.

Rich Media and Flash...

Watch movies in high-definition, as well as other rich media from your virtual desktop. This feature takes the next step in delivering a real desktop experience via the cloud.

Anywhere, Any Device...

Wherever you are you can connect to your hosted virtual desktop . Our networks allow you secure access from any location you wish, which means that you can join colleagues as if you were in the office. Connect from PC, IPAD, Mac or Thin Client

Key Benefits

All you need is a PC, laptop, thin client, or mobile device and an internet connection. Because we provide you with a full Windows environment with all the functionality you'd expect, you'd never know you weren't using a PC. Additional applications can be installed on demand, whilst we backup, manage and maintain the hosted desktops for you, ensuring they're available 24/7

- Financially Economical
- Cut your carbon footprint
- Service Level Guarantee
- Add Resources on-Demand
- Shared File Storage
- Bi-Directional Audio
- Disaster Recovery / Backup
- User and Desktop Management Suite

Free yourself from desktop management

Hosted desktops remove the burden of managing individual desktop environments in-house, leaving you to concentrate on growing your business and maximising turnover.

Information is stored in our highly secure data centres and delivered to you via any internet browser, so your own, fully customisable desktop can be accessed wherever you are, whenever you want. It is exactly the same as using a PC - simply plug into your broadband connection and you're ready to go.

Simple, Easy Migration...

Moving over to cloud computing sounds difficult but is in fact quite a simple process. Hosted desktops provide the same features, tools and ways of working, but with a different method of accessing them. Behind the scenes they bring a raft of benefits, such as a Business Continuity solution built-in.

It's virtually the same...

By keeping the end-user experience familiar you achieve higher levels of satisfaction, no training costs... just a quick and seamless roll out process.
